

Do You or Someone in Your Family Have a History of:
**Glaucoma, Macular Degeneration, Diabetes, Cholesterol or
Blood Pressure Issues?**

If so, at Franklin Family Eyecare we recommend two state of the art procedures that will give Dr. Josephine a better look at the health of your eyes.

Our high-resolution Digital retinal imaging system (Topcon 3D OCT 2000) takes pictures of the inside of your eye (the retina) giving the Doctor the ability to assess the health of your retina and helps her detect and manage eye and health conditions. Finding retinal disorders as early as possible is critical to potentially preventing serious disease progression and even vision loss.

There is a \$25 copay for the Digital Photo

Our Advanced Optical Coherence Tomography Scanner (Topcon 3D OCT 2000) takes a 3-Dimensional image below the surface of your retina, giving the Doctor an even more detailed picture of your eye health.

There is a \$35 copay for the 3D OCT Scan

THESE TESTS ARE BOTH OPTIONAL, BUT HIGHLY RECOMMENDED.

All pictures and scans are carefully reviewed by our Doctor, and become a permanent part of your records. These can be provided to you and/or your other health care providers upon request.

I am interested in these tests: Photo____Scan____
[There is a \$50 copay for both Photo and Scan]

I am not interested in any of these
tests_____

Patient Name: _____
